

Lab Results OnPatient Guide

When lab results are uploaded to your OnPatient Portal, you will receive an email notification from our system (DrChrono) with a direct link to log in. If you no longer have the email, or the link has expired, you can go to www.onpatient.com and log in any time. Once logged in, you will go to one of two areas in your portal:

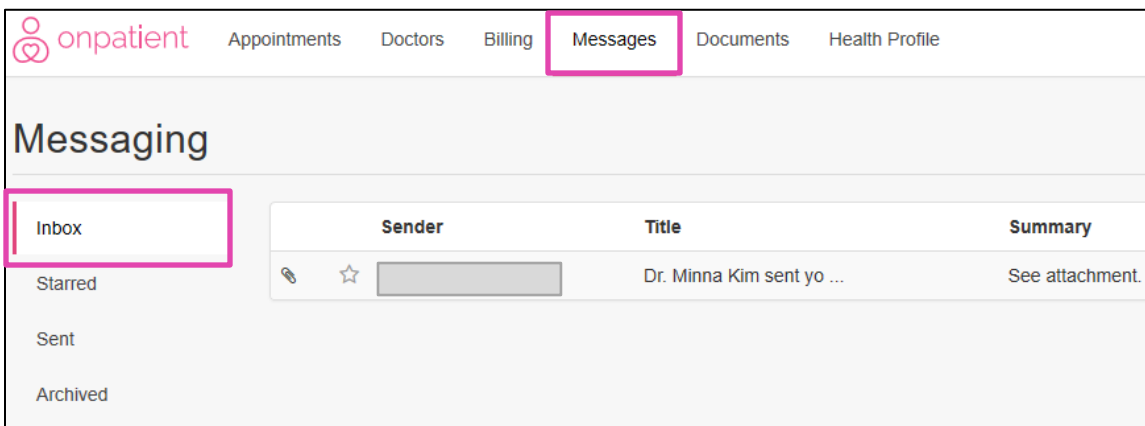

1. Quest and LabCorp

If you used either Quest or LabCorp for your blood draw or sample collection, click on the “Health Profile” tab. You will then click the “Labs” section in the far-left column. Your results will be listed here.

2. Other labs and services

If you used any lab or service other than Quest or LabCorp for your blood draw or sample collection, click on the “Messages” tab. This section houses any documents from external sources that have been uploaded to your portal by our office staff. Your results will be provided in the form of a message attachment.

To ensure the privacy of your health information, be sure to log out after each session. If you have any questions, please contact us at: ifmt.info@gmail.com
